COLLINS CONSTRUCTION MANAGEMENT

FEDERAL / COMMERCIAL / RESIDENTIAL

Construction leadership. Project controls.

We provide construction management, preconstruction, estimating, and scheduling support for federal, commercial, and residential construction projects.

10+ YEARS

Construction industry experience

$250M+

Construction project experience

THREE CORE MARKETS

FEDERAL — Management and project controls for government contractors and teaming partners, including JOC, IDIQ, MACC, MATOC/SATOC, and task orders.

COMMERCIAL — Preconstruction, construction coordination, project leadership, estimates, schedules, and reporting for contractors, owners, and developers.

RESIDENTIAL — Planning, estimating, renovation and construction coordination, and schedule support for builders, developers, and owners.

CORE CAPABILITIES

Project & program management

Multi-project coordination, team leadership, procurement, subcontractor oversight, contract administration, and delivery through closeout.

Proposal & estimating support

Scope reviews, solicitation response support, takeoffs, cost planning, pricing reviews, and constructability-driven preconstruction.

Primavera P6 & Microsoft Project

Schedule development, updates, schedule reviews, CPM analysis, milestone tracking, logic, progress evaluation, and reporting.

Project delivery & turnover

Field coordination, submittals, issue resolution, quality documentation, commissioning coordination, punch lists, and closeout.

Representative experience. Relevant expertise.

Our professional background informs the support we provide today. Representative examples intentionally omit contract titles and project identifiers.

PROJECT EXPERIENCE

Program and task order oversight

JOC/IDIQ leadership involving proposals, cost planning, staffing, team direction, contractor coordination, execution, and closeout.

Federal facility and infrastructure work

Construction management and schedule reviews for occupied facilities, building systems modernization, and civil infrastructure.

European barracks and housing renovation

Schedule reviews for multi-building military renovation, including design approvals, critical path, phased construction, commissioning, and turnover.

Environmental and technical schedule reviews

Critical path, logic, progress, contract milestone, sequencing, and commissioning considerations across complex construction environments.
